SMEC
Smart One,
Global One

- 1988 - Started as Samsung Heavy Industries Machine Tools Business
- 1989 - Horizontal and vertical machining center technology partnership with OKK Japan
- 1991 - Turning center and vertical machining center technology partnership with Mori Seiki
- 1996 - 5-sided processing center technology partnership with Toshiba
- 1999 - Spun out from Samsung Aerospace Industries and established SMEC Co., Ltd

LCV 6700

Superb structural design offering best-in-class heavy duty and precision machining

- High rigidity spindle offering high speed and high precision
- Stable machine structure
- High productivity with short non-cutting time
- Lineup offering various spindle options
 - high speed, high precision direct motor type (8,000 / 12,000rpm)
 - gear motor type (6,000rpm) available with various options such as through spindle cooling

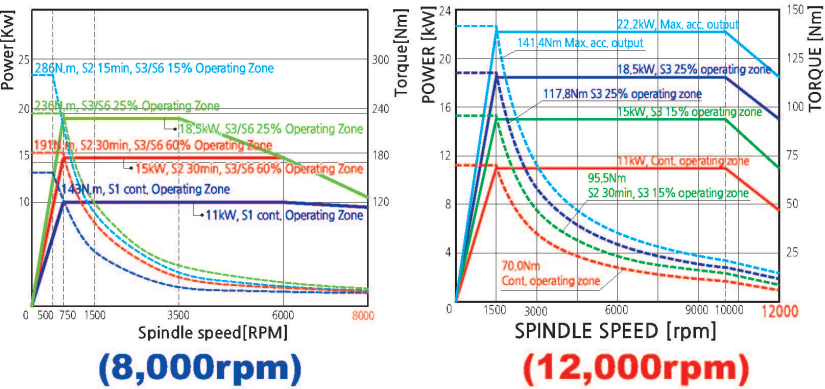

DIRECT HEAD TYPE
[BT50] [BT40]

The spindle is supported by four P4 class high precision angular ball bearings to minimize heat increment. Also belt head takes forced heat emission to minimize thermal expansion to provide high speed and ultra precision machining.

Spindle Speed	Spindle Motor	Spindle Torque
8,000 rpm	11/15/18.5 kW	143/236/286 N.m
Spindle Speed	Spindle Motor	Spindle Torque
12,000 rpm	11/15/18.5/22.2 kW	70/95.5/117.8/141.4 N.m

Spindle Power & Torque Diagram

JACKET circulation cooling system

Adopting semipermanent Grease lubrication system on bearing, minimize thermal displacement by Jacket circulation cooling through Fan Cooler on bearing housing, showing stable performance to take longer spindle life time. Minimize thermal displacement by standard spindle motor base cooling system

(OIL COOLING :
STD : BT40 12R, OPT : BT50 8R)

Std. BT50 6R, BT40 12R
Opt. BT50 8R

High-speed tool changer being driven by enhanced technologies

Double Swing arm type auto tool changer

It is Double swing arm swing type by memory random method and has no error during tool changing and minimize idle time.

Tool to Tool : **BT 50 : 2.5sec**
BT 40 : 1.2sec

Tool Magazine

Highest tool storing capabilities in its class to be suitable wide machining area and adopting a cartridge type port for easy repair

Tool Magazine Capacity : **30ea**

GEARED HEAD TYPE [BT50]

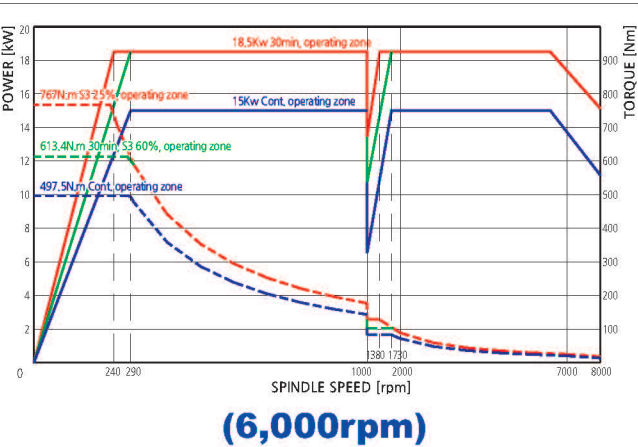

Spindle Speed
6,000 rpm

Spindle Motor
15/18.5 kW

Spindle Torque
497.5/613.5/767 N.m

Sub-Spindle Power & Torque Diagram

JACKET circulation cooling system

Adopting semipermanent Grease lubrication system on bearing, minimize thermal displacement by Jacket circulation cooling through Fan Cooler on bearing housing, showing stable performance to take longer spindle life time.
Minimize thermal displacement by standard spindle motor base cooling system.
Highly effective cooling via supply of cooling oil to the gears.

Gear and bearing cooling

Coolant circulation inside and outside of spindle housing

Description		LCV 6700
Table Size	mm	1,550×670
Travel(X/Y/Z)	mm	1,350/670/650
MAX. Load	kg	1,000
Rapid Traverse Rate(X/Y/Z)	m/min	30/30/24

Bed

Wide Box guideways provide excellent support for the saddle to prevent table overhang, and a rigid triangular rib body structure ensures minimal machine vibration and structural deformation even during heavy machining.

Saddle : Bed Guide
2,570 : 1,200mm

Pendant arm / Operation panel

Pendant/panel design by considering user space and convenience improve working environment

High efficiency Spindle Head Cooling System
STD. BT50 6R, BT40 12R
OTP. BT50 8R

For long-term continuous high-speed operation, a coolant system may be installed to maintain room temperature. The coolant system circulates coolant oil around the spindle bearings to prevent thermal expansion due to the spindle temperature, ensuring high precision machining.

Centralized utility check

With the centralized utility check layout, operators can easily check operation status of lubrication, bearing fluid, air supply. Etc

Dual Contact Spindle(BBT50/BBT40)

Dual contact system to contact both main spindle surface and taper surface dually by measuring elastic deformation of spindle surface that occurs when main spindle is clamped.
- Simultaneous contact to both main spindle surface and taper increases rigidity and reduces vibration.
- Increases machining capacity and surface roughness even under harsh condition.
- 100% compatible with existing tools.(BT50/BT40)

(Simultaneous Dual Contact)

Automatic Lubrication Dispenser

Automatic lubrication dispenser that reliably dispenses the required amount of lubrication to the required travel axes. Lubrication is only dispensed when the travel axes is in operation, reducing the amount of lubrication that is consumed. When there is problem on Lubrication line it shows warning message on a screen and stop the machine for users safety operation.

Feed axes operation : direct coupling to servo motors

- Power conversion via direct coupling
- Minimized backlash during axis feed

Large Ø40mm ball screws clamped both ends with pre-tension type axis moving structure.

Minimal Thermal expansion is achieved by applying pre-tensioned ballscrews clamped both ends. Both ends are secured by four P4 class high precision thrust angular bearings and the bearings are lubricated by forced lubrication system to provide extended life of the bearings.

Designed for superb chip discharge

- Inclined surface on all SLIDE COVERS and BASE COVERS.
- Standard inclined chute installed where chips fall so they are discharged to the coolant tank on the left-side
- Coil mounting part attached on BED part instead of S / GUARD prevents noise and S / GUARD damage during operation

High rigidity & performance travel system

Stable Machine Structure

- Low center of gravity design and stable wide bed surface
- Heat treated and polished slideways
- High rigidity box-type body with triangular rib structure

Largest-in-Class Internal Area

- Can fit up to Ø320 large rotary table
- Easy to wire/pipe for automation
- Largest-in-class work space

LCV 6700

Stroke :1350x670x650mm(Table:1550x670)

Automatic Lubrication Dispenser

Removable coolant tank

Put coolant tank on left side of the machine for easy coolant exchange and cleaning as well as pump maintenance.

User friendly centralized control panel.

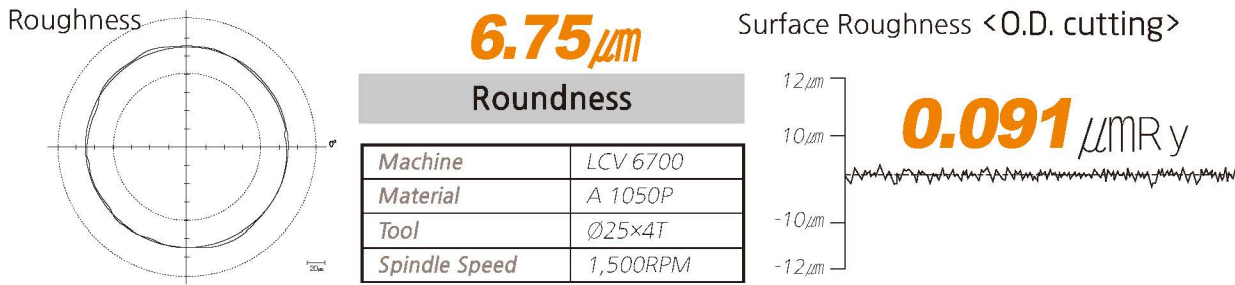

- 1 CRT : 10.4 inch color LCD
- 2 Bigger BEZEL switch size : 50% larger than the conventional switch size
- 3 Addition of MG stand-by tool No
- 4 Addition of MG change button
- 5 Addition of 4th and 5th axis switch
- 6 Spindle Override 50~120% (15 step) → 50~150% (20 step change) Feed Override 0~1260 (16 step) → 0~5000 (21 step change)
- 7 Addition of spare buttons for fixtures

Standard Accessories

- Full splash guard

- Coolant system

- Leveling parts (Level plate, bolt, etc.)

- Standard tools and tool box

- Lubrication system

- Work light
- 3 step patrol lamp

- Rigid tapping

- Spindle override

- Spindle tachometer

- Door inter lock

- Hydraulic unit
- MPG handle

- Manual and parts list

- 10.4" LCD OP Screen

Optional Accessories

- Air gun

- Air blow

- Coolant gun

- Rotary table

- Oil skimmer

- Coolant level gauge
- Through spindle coolant (TSC 20Bar)

- MPG handle(3ea)

- Air conditioner for electric cabinet

- Tool measuring system

- Lift-up chip conveyor (HINGE TYPE / SCRAPPER TYPE)

- OIL COOLER
