PCV Series
PCV 430/460

Offering high speed, high precision machining in a compact design with the best in class performance to cost ratio.

- Easy to use and easy to maintain design
- highy rigid, single piece bed designed for low center of gravity
- widest in class Roller Type LM Guide saddle to prevent overhang
- high speed, high rigidity direct-coupled spindle

		PCV 430	PCV 460
Travel (X/Y/Z)	mm	700/430/510	700/460/510
Table size	mm	750 x 420	750 x 420
Table loading capacity	kgf	560	560
Table surface	mm	18H8 × p125 × 3ea	18H8 × p125 × 3ea
Max. spindle speed	rpm	10,000	15,000
Tool-to-tool time	sec	1.3	1.3
Rapid traverse (X/Y/Z)	mm	48/48/36	48/48/36
Tool storage capacity	EA	24	24

High Efficiency

Enhanced high-speed machining significantly reducing non-cutting time

High Rigidity

Ensuring customer satisfaction and trust with high precision, high quality machining

Economic
Best cost effective solution with best performance to cost

Efficient Machining

Most compact in class design for greatest machining efficiency

High efficiency

Rapid traverse (X/Y/Z axis)
## 48/48/36 m/min

Roller type LM guide way

Highly responsive Roller Type LM Guideways offer superior rapid traverse speeds, reducing non-cutting time while minimizing noise during operation.

- high speed, high rigidity, enhanced durability
- compared to Ball Type LM Guides, it offers improved wear resistance, precision travel and product lifetime

	Non-cutting time	Cutting time	Total cutting time
Similar model	14 min 39 sec	31 min 41 sec	approx 46 min
			9% reduced
PCV 430	13 min 09 sec	29 min 12 sec	Total cutting time approx 42 min

※ The above data is based on internal testing. Values may change depending on cutting conditions.

Rigidity
High precision design offers high precision cutting quality

- highly rigid, single piece bed design for low center of gravity
- widest in class Roller Type LM Guide saddle to prevent overhang
- high speed, high rigidity direct-coupled spindle

+X
+Y

Roundness
4.5μm

Feedrate
1,000mm/min

Economic

Cost Down
Quality Up

Similar model	PCV 430	Similar model	PCV 430

By optimizing performance compared to its cost, it offers the most cost effectiveness in its class with its enhanced cost efficiency.
"12% more cost effective than similar model"

## Space Efficiency

PCV 430
Similar model

Compact design

- minimized installation footprint with compact design
- effective chip discharge design
- centralized OP panel for operator convenience
- more units can be installed in the same factory floorspace
"14% more space efficient than similar model"

Machine Design

Direct-coupled spindle for high speed, high precision
Through-spindle coolant (TSC) ready head assy design with TSC ready spindle and TSC coolant unit.

Z-axis column & headstock

Highly rigid column and wide guideway span, ensures high spindle rigidity during heavy machining

X-axis saddle & table

Saddle with wide guideway span enables highly rigid machining over long periods of time
Bed & saddle

Highly rigid, single-piece bed designed for low-center of gravity with widest in class saddle span to prevent overhang

Model	Travel(mm)		
	X-axis	Y-axis	Z-axis
PCV 430	700	430	510

PCV 430   PCV 460

Spindle to table-top distance

PCV 430
130 ~ 640 mm

PCV 460
330 ~ 840 mm

Spindle

Spindle motor base cooling

Spindle in & out circulation cooiing

The ultra precision spindle is supported by 4 rows of P4 class high-speed angular bearings allowing high speed, high precision machining with the direct-coupled head that minimizes thermal growth through forced heat dissipation.

10,000rpm Motor

Spindle Power(Cont/Max)
11/20.4kW

Spindle Torque(Cont/Max)
52.5/130N·m

※PCV 430 standard specifications

15,000rpm Motor

Spindle Power(Cont/Max)
11/15kW

Spindle Torque(Cont/Max)
57.3/119N·m

※PCV 430 standard specifications

JACKET Circulation Cooling

Semi-permanent grease lubrication applied to the bearings, while thermal growth is minimized using jacket circulation cooiing around the bearing housing (a source of heat) bia a Fan Cooler, ensuring stable performance and extending the lifetime of the spindle.

ATC / Magazine

ATC Magazine

Designed with a standard 24 tool magazine with short travel distance to enable quick tool changes

Fast and errorless tool changes are made possible using the memory random technique and double arm type tool changer, minimizing non-cutting time

Tool storage capacity : **24**EA

Tool-to-tool time : **1.3**sec

Max. tool dia.(adjacent empty) : **80(125)**mm

Max. tool length : **300**mm

Max. tool weight : **8**kg

Table

Table size and Table loading capacity were increased to support larger work area

Table size : **750×420**mm

Table surface : **18H8×p125×3**ea

Table loading capacity : **560**kgf

3-Stage Chip Disposal

Stage 1. Coolant pipe flushing (from left and right)

Standard direction of discharge into bucket

Stage 2. Coolant nozzle flushing (from front to back)

Complete chip discharge through the series of chip disposal processes by the coolant pipe, coolant nozzle and chip conveyor.

- the large, rectangular S/GUARD design and rear coolant tank ensures easy chip removal

- using bed flushing, complete chip disposal off the surface of the bed (optional, PCV 460 not available)

- the left-side lift-up chip conveyor easily removes chips away from the tank for operator convenience (optional, PCV 460 not available)

Automated Coolant Supply
Large capacity coolant tank located behind the machine enables easy coolant exchange, tank cleaning and pump maintenance

OPT. Chip Conveyor

STD. Coolant Tank

STD. Coolant Pump

OPT. Bed Flushing Pump

OPT. TSC Unit

OPT. Oil Skimmer(Belt)

OPT. Coolant Level Switch

OPT. Coolant Gun Pump

Coolant tank capacity : **240**ℓ(PCV 430)
290ℓ(PCV 460)

▪▪ Options

Spindle oil cooler

For long-term high speed continuous operation, an oil cooler may be installed. This system circulates cooled oil around the spindle bearings preventing spindle thermal growth and enabling high precision machining.
Rotary table and air/hyd fixture preparation

Components necessary for the installation of rotary table and fixtures may be added during assembly wherein hydraulic or pneumatic preparation may be selected.
Tool measurement probe

Various automated tool diameter, length and lifetime measuring devices may be installed.

Measurement method : Touch probe
Repeatability : ± 1 ㎛

Measurement method : Non-contact
Repeatability : ± 0.1 ㎛
Min. tool detection : 0.03mm

Internal coil conveyor

Coil conveyors may be added to enhance chip and coolant discharge

High column

When the distance between the table top and the spindle nose needs to be extended, such as to accommodate a fixture, a riser block may be added to extend the distance.
Through spindle cooling (TSC)

The TSC option may be added to improve machining effectiveness

▪▪ Cutting performance

Machining Solution (STD)

S4 (SMEC SMOOTH SURFACE SYSTEM) Package

High performance NC options to improve machining performance provided as standard

10.4 inch LCD monitor standard	Screen size increased from 8.4 inch to 10.4 inch
AICC II (AI Contour Control II)	Efficient accel/decelaration (200 block look ahead)
Jerk control	Speed control during acceleration changes
Smooth tolerance plus control	Stable curved shape forming
Machining quality selection function	Adjust accuracy level according to machining conditions
Manual Guide i	Visual machining check and setup guide
Part rogram storage	2MB (5,120M)
Number of registered programs	1,000ea

Without S4 Package   With S4 Package

IoT Solution (OPT)

NC-Gate
Basic Platform

IoT-Gate
Expansion Platform

NC-Gate / IoT-Gate

The NC-Gate / IoT-Gate that was developed in-house with our ICT technology is a universal gateway that not only interworks with our machine tools, but machine tools from other manufacturers, robots, automation equipment, and analog / digital sensors as a network device capable of bi-directional communication.

Supported drivers : Fanuc / Mitsubishi / Siemens NC, Modbus TCP, DeviceNet, Profibus, Ethernet, AI/DI/DO
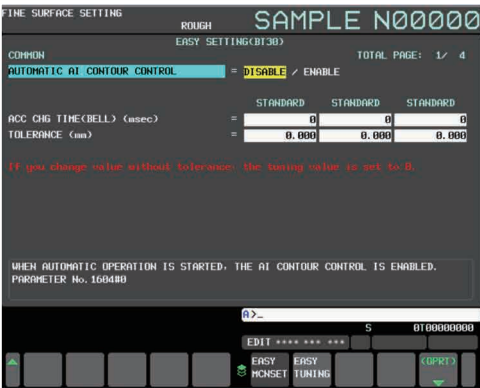

KPI (Key Performance Indexes)

Provides key performance indicators and displays target achievement

· Indicators : achievement rate, productivity, process defect rate, equipment and factory usage, quality defect rate, lead time, and average cycle time

OEE (Overall Equipment Effectiveness)

Provides figures and graphs of overall equipment effectiveness

· Availability, performance, quality, etc.

Realtime Monitoring

Provides operation status and alarm information in case of problems in the production line

· Provides information about the operation status, speed, production alarms, etc. of each machine

Remote Control/ Management

Remote control and operation

· Emergency stop switch, program editing, etc.

Remote A/S
Problem diagnosis via remote control

· Provide remote diagnosis services to users via the IIoT solution

SMEC User Interface

Fanuc 0i MF Plus

- 10.4'' LCD color display
- Part program size 2MB
- High quality designed OP Panel
- SMEC Custom S/W
- Portable M.P.G

SMEC Custom S/W displayed using MDI's [UPDATE] button or OP Panel's [CUSTOM] button

◄ CUSTOM : Provide operator convenience and improve productivity using the support function for tool management and additional device setting.

SMEC HMI

M/G-Code check function

Allows the operator to directly read the M/G-Code on the machine for easy application programming
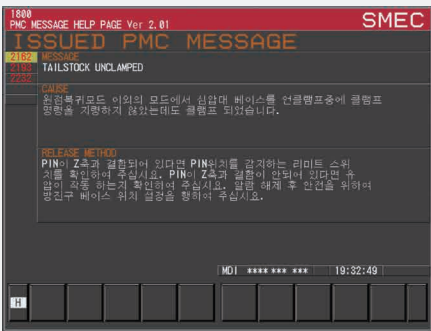

PMC alarm check function

When a PMC alarm occurs, the cause and countermeasures are described in detail, making operation and maintenance more convenient

ATC Magazine status check, setting and maintenance function

Work coordinates, tool setting support function

Counter for each T-Code
